Established 1910

TO OUR FRIENDS AND CUSTOMERS:

With pleasure we present to you our catalogue for 1934. Here will be found one of the finest collections of standard and novelty bulbs and plants at extremely low prices without sacrificing quality.

We are always glad to welcome visitors to our gardens who may be interested in our flowers, for one can always select to much better satisfaction in the field from seeing the flowers and plants than from any descriptive catalogue, be it ever so elaborate.

To our Twin City Customers, if it is more convenient you may leave your orders with Donaldson's Flower Department, Minneapolis, or the Golden Rule Flower Shop, St. Paul, where they may be charged to your regular accounts if so desired.

Sincerely yours,

J. V. EDLUND,

12th St. and Division Ave.,

White Bear Lake, Minn.

Dahlias

Dahlias are easily grown, requiring no special soil or treatment to bring them to perfection. They like an open, sunny situation, but also succeed in partial afternoon shade.

Prepare the soil thoroughly by spading 12 to 18 inches deep, and if the soil is poor work in some 2-16-8 Commercial fertilizer about two weeks in advance of planting, about six or seven pounds to 100 square feet. Dig holes 3 to 4 feet apart and about 5 inches deep; drive a stout stake in each hole and lay the tuber down flat with the crown toward the stake and the eye upward, then cover with 2 or 3 inches of soil, leaving the balance of the hole to be filled up later, after the plant comes up.

Plant any time from May 15th to June 15th in this vicinity, the later date being the best for exhibition flowers.

To prevent the plants from growing too tall, they can be pinched back at the top when they have made their third set of leaves, this will make them branch and we think produce more blooms.

Allow only one plant to each stake. Tie plant securely to stake as it continues to grow. Cultivate at least once every week and after each rain, until the buds appear, rake in the soil a handful of hardwood ashes if possible and mulch the ground with well-rotted manure or lawn clippings and water thoroughly whenever the plants need it.

Disbudding the side buds, leaving only the terminal bud to develop, will bring larger blossoms.

After the plants have been killed by hard frost they should be carefully dug, allowed to dry a few hours, and stored in a dry cellar, tops down and with dry soil over them to keep from shriveling. We have them stored in boxes or barrels and covered them with dry peat with excellent results.

IMPORTANT

Of recent years thrip has become so prevalent that it is necessary to spray, at weekly intervals during the growing season.

Often times the producer is blamed for poor stock when it has been the work of the thrip or aphid.

Thrips are tiny insects that enter the growing tip or shoot and chafe the newly formed leaves, injuring them so that they develop malformed and curled. These insects seem to enjoy the life blood of certain varieties on account of its flavor and do not molest the adjacent bush.

If the attack is not checked it will result in a stunted bush; we use a solution of Evergreen.

GREEN PLANTS

Our cuttings are taken from stock of healthy named varieties and grown cold, it has been our experience that cold grown plants will establish themselves more quickly than if grown under a very warm condition when they are moved to the field and they need not be protected against the warm sun.

The popularity of our green plants is growing fast, and we suggest that you give them a trial on your next order if you are buying the higher-priced varieties, as plants are about one-half of root price in most cases. Green plants when properly grown from healthy stock, give equal or better blooms than from roots.

Plants should be set a little deeper than roots, plant at least six inches deep, the lower leaves may be removed if necessary, the after-cultivation and care of plants should be the same as for roots. Our plants will be ready for shipment after May 20th.

Full Illustrated Cultural Directions furnished with each order.

ASBURY PARK (Wood) F. D.—This is a very vigorous growing variety. The color is a light coral pink and is one shade throughout the entire flower. The stems are as stiff as a rod and the blooms are usually produced at a pleasing angle to the stem.....Roots, **\$2.00**

BAGDAD (Redfern) I. D.—A new orange red of immense size. The most brilliantly colored Dahlia in existence; erect long stems.
Roots, **\$1.50**; Plants, **75¢**

DOROTHY STONE (F. & M.) F. D.—A beautiful rose-pink that was a rival for Kathleen Norris last year. Many prefer this variety; it is a splendid grower, the foliage being tough and leathery in texture. The stems are good and the large flowers are produced freely.....Roots, **\$1.00**

EAGLE ROCK WONDER (Broomhall) S. C.—A free bloomer of tremendous size. Color is orange to orange-buff with tints of coral red and coral pink; the flowers are held above the foliage on stiff cane-like stems. Bush is stocky robust grower with heavy leathery insect resistant foliage.
Plants, **\$1.00**

FORT MONMOUTH (Kemp) I. D.—One of the giants of the Dahlia world. The color is a rich crimson maroon with a brightness unusual in the darker tones, just a faint tinge of bluish violet at tips of petals. Flowers are borne on long stems high above the foliage. A Dahlia we like to recommend Roots, **\$1.00**

GIRL OF HILLCREST (Kemp) F. D.—A brilliant Mikado-orange, the flowers are 9-10 inches across and of great depth. Plant is a strong grower and exceedingly prolific in bloom from early to late.....Plants, **\$1.50**

GROVER WHALEN, F. D.—A fine autumn color of rich orange with tints of bronze. Especially fine for cutting on account of its good keeping qualities. Heavy leathery foliage.....Roots, **\$1.00**

**INDIANA MOON (Martin) I. D.—**

The color of this variety is hard to describe as there are so many colors to its makeup. The trial garden describes it as flesh ocher with faint lines of spinel pink running through some of the petals.....Plants **\$1.50**

JANE COWL (Downs)—Decorative.

The outstanding Dahlia at every show. A consistent prize winner throughout the country. It is a large deep flower with colorings of warm buff and old gold, blending salmon at its perfect center. We consider this to be the best Dahlia to date.....Roots **75¢**; Plants **50¢**

JANET SOUTHWICK (Chapman)

I. D.—Here is one with petals of a different formation. A deep tyrian rose with a rose sheen over all, making it especially beautiful. The flowers are held facing up and well above the foliage. A good stocky, robust and prolific bloomer.

Plants **\$2.50**

JERSEY'S BEACON (Waite) F. D.—

A decided novelty of Chinese scarlet with a paler reverse, giving a two-toned effect. An exhibition

flower of vigorous growth; excellent stem.....Roots **75¢**; Plants **50¢**

JERSEY'S BEAUTY (Waite)—A beautiful erosine pink. Decorative of great size, the blooms are carried high above the foliage on long wiry stems, a perfect true pink, wonderful keeper when cut. Probably the most talked of Dahlia today.....Plants **50¢**

JERSEY'S GLORY (Waite) F. D.—The flowers are large and of good form, well placed on the stems. The color is best described as a yellow hue of orange. The stems are long and stiff, but sometimes arch gracefully.....Roots **\$1.00**

JIM MOORE (Loller) I. D.—One of the outstanding Dahlias of 1930. The color is a clear primrose yellow shading to gold, with tints and flushes of salmon throughout the flower; the stem is long and strong, holding blooms facingPlants **75¢**

JOSEPHINE G. (Ruschmohr) S. C.—Color, true rose pink, petals tipped pinard yellow. Its fluted petals, vivid coloring, proud upright blooms and splendid habits of growth make it a real addition to any collection.....Plants **75¢**

KATHERINE COLE (McDowell)—F. D.—In color it is a beautiful light pink and cream. The tips of the petals are pink, shading to cream, with a pink center. The stems are long and stiff, and the flower is always facing youPlants **75¢**

KENTUCKY RED (I. D.)—A bright vivid scarlet that is very attractive and distinct in its color; the flowers are large and held erect on strong stiff stems. Blooms will not burn in the hottest sun.....Plants **\$1.50**

KING MIDAS (Peacock) I. D.—We believe this to be one of the best pure golden yellow Dahlias grown. It has a full, high center to the end of the season. Stems erect and plant growth sturdy. A good exhibition or garden yellowRoots **\$1.00**

LA MEXICANA (Fisher & Mason) S. C.—A difficult color to describe. Burnt orange toning to copper, center of flower lighter in shade and tips of petals slightly tinged with gold; an extremely early and free bloomer. Roots **\$1.00**

MARMION (Tyler) I. D.—A pure golden yellow, with bronze suffusion on reverse of petals and a deeper bronzy tone on the high center, and outlining each petal. Vigorous growing bush and a good free bloomer.....Plants **75¢**

MARY ELLEN (Loller) I. D.—The color of this new Dahlia is a lavender pink with considerably more pink than lavender. The flowers are held erect on the best of stems, well above the robust and prolific flowering bush, it has the best of keeping qualities.....Plants **\$1.00**

- MONMOUTH CHAMPION (Kemp) F. D.**—A strong, vigorous grower producing extra large blooms of a brilliant orange flame. The stems are perfect and is a splendid exhibition flower.....Roots **\$1.25**
- MRS. I. DE VER WARNER (Marean) F. D.**—Very large, beautiful flowers of fine form and substance. Color is rich mauve. Stems long and rigid. Very attractive in the garden and one of the best for exhibition and cutting Roots **50¢**
- PAPILLON (Bessie Boston) I. D.**—This is a beautiful shade of old rose with golden lights, fine form and very free bloomer. A seedling of Geo. Walters and a great improvement on that favorite old variety.....Plants **75¢**
- PRINCE OF PERSHIA (Newson) I. D.**—A new giant red from California; the color is a dark, cardinal red, in a long stemmed, long petaled, deep flower. A nice clean grower in the garden.....Plants **\$1.50**
- SAGAMORE (Badetty) F. D.**—Light apricot buff, shading with a warm salmon rose and orange buff. A good grower and excellent bloomer. Blooms are highly prized for their color and keeping qualities.....Roots **75¢**
- SANHICANS QUEEN (Fisher & Masson) F. D.**—An unusual color that is hard to describe. A blending of apricot with a feint brushing of carmine rose deepening towards the tight center. Plant has excellent habit of growth and medium height.....Roots **\$1.00**
- SHAHRAZAD (Newson) I. D.**—A fine, sturdy deep pink seedling of Jane Cowl. The large flowers have good substance and depth and are carried erect on cane-like stems. The plant is tall and vigorous.....Plants **\$1.00**
- SUNNY SOUTH (Broomall) Cactus.** A bright clear yellow without any shading of fine formation. The flowers are held high above the foliage.....Roots **\$1.00**
- TANG (Downs) I. D.**—Strikingly beautiful, with unusual color and style all its own. Bright tawny orange flame. Long petals that roll and twist and show a golden buff reverse to such a marked degree that the flower at first appears to have two colors.....Plants **\$1.00**
- THE WORLD (Dahliadel) F. D.**—The color of this variety is a rich deep rosy magenta overlaid garnet, and with silver shadings on the edges of the petals. The stems are perfect. Foliage heavy and resistant to insects. A thrifty grower and admired very much the past year.....Roots **\$1.00**
- THOS. A. EDISON (Dahliadel) F. D.**—Royal purple. A massive flower of distinct coloring and form, held erect on cane stiff stems. A strong sturdy grower of medium height.....Roots **\$1.25**
- WHITE WONDER (Kemp) I. D.**—Pure white, a new Dahlia of great merit, producing flowers of enormous size, on very good stems and insect resisting foliagePlants **\$4.00**

BEGINNERS COLLECTION OF DAHLIAS

For those who are not familiar with the different varieties of Dahlias. We will send you six Dahlia roots, all different and labeled correctly, for \$2.50 pre-paid. This collection is made up from surplus roots, some of which we have not in sufficient quantity to list in catalog.

Pompon Dahlias

This class is a miniature form of the show or ball Dahlias, having the same round, ball-like form, but much smaller in size. The plants are also smaller, of branching habit, producing the flowers in endless profusion. As they can be cut in sprays they are valuable for bouquets and particularly table decorations. They last a long time when cut.

We only offer tubers of these as we do not propagate green plants of this section.

- AMBER OUEEN**—Very fine deep amber.....Each **35¢**
- BELLE OF SPRINGFIELD**—One of the smallest and most popular of the exhibition table. Soft red.....Each **50¢**
- DAINTY**—Tiny pointed petals of white, shading to pink.....Each **35¢**

How to Grow Gladiolus

Plant the bulbs in well-worked soil 5 to 6 inches deep. Deep planting will serve to protect the roots from the hot sun, keeping more moisture about the roots, and also serves to hold up the heavy spike after it has grown to its full height.

The Gladiolus will thrive in almost any good garden soil, but seems best results are obtained in soil that is more or less sandy. Plant in a sunny location away from trees and large shrubs. The finest planting may be made in the spring as soon as the ground is warm and in good workable condition. If a succession of blooms is desired throughout the summer, new plantings may be made about 10 days after the foliage of the previous planting show through the ground and additional plantings continued until the last week in June, which is about as late as is safe to make the last planting in order to secure flowers before frost.

Cultivate often and thoroughly; the more you cultivate the better they grow. Do not allow the ground to bake around the plants. The bulbs should be dug before the plants are too ripe and before hard frosts. Dig the bulbs and cut off the tops close to the bulbs. Dry well in the open air and sunshine, then put in dry airy place for two or three weeks to cure. Be sure to protect against frost. As soon as well dried the old bulbs, bublets and roots can easily be removed.

Put bulbs in trays not over four inches deep. Store in cellar or basement where the temperature is uniform and around 40 or 45 degrees.

MINNESOTA GROWN

Minnesota grown bulbs are conceded to be the best produced anywhere, because of the climatic conditions which tend to develop a much firmer, healthier bulb than those grown under warmer and more humid climatic conditions.

GLADIOLUS THRIPS

While our Gladiolus bulbs are entirely free from this pest it would be worth while to disinfect all bulbs just prior to planting. We use a solution of seven gallons of water to one-half pint of Formaldehyde and soak the bulbs for seven to ten hours.

Succulents

For Rock Gardens

These plants are becoming more popular each year, as they can be planted in the rock garden in the spring when danger of frost is past and in the fall they can be planted in the indoor rockeries, we will send a collection of 10 varieties for \$2.00

Montbretias

One of the brightest of our late summer and fall flowering bulbs. They should be set out early in April. They should be planted and handled the same as Gladiolus. We offer only the variety *Crocsmiaeflora* which is a color of orange scarlet. Strong bulbs, per Doz. \$1.00.

Mastodon Strawberries

We have grown Mastodon strawberries for the past four years and have found them to be far superior to any everbearing strawberry we have ever seen; planted early they will begin bearing about August 1st and continue until killed by heavy frost and again an early crop in the spring; plant in rows about three feet apart and one foot in the row and keep free from weeds and remove all blossoms until about July 1st, then give them a good dressing of well-rotted manure and a good mulch. Our plants are the true Mastodon ever-bearer. Doz. 50¢; one hundred \$3.50, postpaid.

Hybrid Delphiniums

Delphiniums are perfectly hardy; there has been a great revival of interest in them the past few years due to the wonderful improvements that have been made in them. Several famous hybridizers have been working on them and have produced new forms and types and beautiful colorings, many of them now having beautiful shades of pink, mauve and purple mingled with the various shades of blue and shades of white.

Our plants are grown from the finest seeds obtainable in England and

France, which are in no comparison with the old common kinds; they can be planted in September or early spring and bloom the first year. We offer in assorted colors one year plants; each **\$1.00**; Doz. **\$10.00**.

We are also offering for spring delivery only, pot-grown plants of Delphiniums. These plants are the same that we will be using for our own planting. To those who have had difficulty in germinating the seed of Delphiniums, this is an opportunity to get these young unflowered plants, and thus get the initial benefit from them.

These plants will all bloom from August until frost, giving spikes from 3 to 4 feet in height and the following year they will be at their best.

Plants carefully packed and guaranteed to arrive safely, **\$4.00** per Doz.

Peonies

Peonies are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted, increase in beauty each year.

Planting—Peonies may be planted any time in the Fall, from September 1st until the ground freezes. No Peonies are handled by us in the Spring, as that is entirely the wrong time to plant them.

Size of Root—Making a specialty of growing Peonies and Gladiolus our progress depends entirely upon the results obtained from our roots and bulbs; for this reason we quote prices on 3 to 5 eye, or large divisions only.

Important! An important point to observe in the planting of Peonies is not to plant too deep. The roots should be placed so that the eyes are two inches below the surface, and the soil tightly packed about them.

It will be noticed that we are not quoting any Peonies for less than \$1.00 as we cannot grow, care for our stock, dig, pack, label and supply our customers with good, strong plants and make a living profit for less than this amount.

Discounts—On all orders amounting to \$10.00 or more a discount of 10% will be allowed when cash accompanies the order.

The figures that follow the variety name denote the rating given by the American Peony Society. The valuation is based on a possible score of ten. Where no rating is shown, the variety is too new to have had sufficient votes to be properly judged.

I r i s e s

Iris grow easier and multiply faster than any other perennial.

They should be planted in a sunny location that has good drainage. The bulb or rhizome should be planted just under the surface, not too deep. The roots should be spread out and the soil packed around them.

Bone-meal and ground limestone are good fertilizers. The best time for planting is July and August.

Following the name of each variety is given the exhibition rating of the flower as established on scale of 100 by the American Iris Society.

Originators' names have been abbreviated as follows:

Gey.—Geylenek, Gros.—Groschner, G. & K.—Koenemann, Lem.—Lemon, Mit.—Mitchel, Mor.—Morrison, Sturt.—Sturtevant, Verd.—Verdier, Vilm.—Vilmorine, Wmson.—Williamson.

S. means standards or upright petals; F.—Falls or lower petals; B.—Beard.

French Lilacs

In your garden you derive continual enjoyment from a planting of French Lilacs. Unlike many other plants unusually beautiful, lilacs require little attention after they have been properly planted and last many years, rewarding your foresight time and again with a greater abundance of flowers.

French Lilacs can be planted in the Spring or Fall, but if planted in the Spring they should be planted very early before they start into bud.

If not convenient to plant in early Spring, the ideal time is October or early November. Our Lilacs are on their own roots.

It is well to dig around and mulch the plant in the fall with good manure and dig it in the spring, and every few years a good coat of bone meal is beneficial.

ALPHONSE LAVALLE—Double. A tall robust growing variety that makes a very shapely bush. Panicles long, broad, shapely and compact. Open an intense blue, but as the florets develop it changes to a beautiful shade of lilacOwn root plants, 3 to 4 feet **\$1.50**

BELLE DE NANCY—Double. Strong plant with slender graceful growth. Profuse in bloom with panicles of nice shape and good size. One of the very best double lilacs of a delicate pink.....Own root plants, 3 to 4 feet **\$1.50**

CHARLES JOLY—Double. Purple red. We think this is one of the best of the dark double reds. Bush medium both in size and height with limbs growing very upright. Blooms rather large, and held erect and make a very striking appearance as they show well above the foliage.
Own root plants, 3 to 4 feet **\$1.50**

CHARLES TENTH—Single. One of the most dependable of the single red lilacs. A very thrifty growing bush that begins blooming very young, and blooming as two year old and produces a quality of bloom.
Own root plants, 4 to 5 feet **\$1.50**

HUGO KOSTER—Double. Lavender. One of the newer sorts and quite an improvement over older varieties of its color. Panicles very large, broad at base, and tapering nicely towards the top. Color a deep lavender with tracings of pink.....Own root plants, 3 to 4 feet **\$1.50**

JACQUES CALLOT—Double. Purple. A real good purple that we like to recommend, on account of its good growing habit.
Own root plants, 3 to 4 feet **\$1.50**

LAMARCK—Single. Light blue. A clear light blue of a most pleasing shade. The panicles are large and long, free bloomer, and good grower.
Own root plants, 3 to 4 feet **\$2.00**

MARIE LE GRAYE—Single. Pure creamy white. The panicles are large and rather openly built. The plant is a young and profuse bloomer, often blooming as two year old and produces a quantity of bloom.
